

FillPak[®]

Faster throughput,
High volume void fill

Cost effective

Runs at high speed allowing maximum box throughput

Time savings

Fanfold bundles of paper offer minimal handling time

Simple

Easy to use with multiple speed levels and EDS mode

The **fastest in-line solution** for filling boxes in **high volume** packaging operations

The FillPak converter forms single layer kraft paper into a high volume PaperStar[™] configuration, which can be used as an effective filling material. It prevents products from shifting around in their box, ensuring damage-free arrival. The converted paper gets dispensed directly at the point of operation, improving the efficiency of the packaging process and optimizing the speed of working.

Go Green

Our company works with FSC and SFI certified suppliers. Paper is climate neutral, recyclable and also a renewable source.

Specifications:

Converter

- Dimensions: 35" x 93" x 38"
- Weight: 413 lbs.
- Power: 115 VAC, 60 Hz, 1.7 Amps
- Feed Rate: 30", 45" or 55" per second
- Cut method: Automatic

Paper

- Paper Options: 30
- Bundle length: 1,660'
- Bundle width: 30"
- Bundle weight: 43 lbs.

Our Added value

Packaging Engineering

Ranpak will analyze your current packaging solution and perform a drop test, demonstrating how much shock is transmitted to your products through the packaging. Ranpak then suggests proper packaging techniques to improve protection and save costs.

Integrated Applications

The Ranpak Custom Engineering department can design modifications, customizations and other innovative solutions to integrate the packaging converter anywhere around, above or under a packing area.

Packaging Training

Training from our packaging experts can help your packers use up to 20% less packing material without compromising the quality of the packaging.

Successful in these industries

e-commerce	Computers	Construction	Electronics
Housewares	Medical Supplies	Retail	Publishing
