

August 22, 2014

Dear Valued Customer:

Our resin suppliers have informed AEP that due to unplanned outages, increasing energy and feedstock costs, and improved global demand they will implement a polyethylene price increase effective September 1st.

Based on the September 1st PE increase AEP Stretch Film will implement a 6% increase for all grades of stretch film effective with all orders placed on or after September 22nd, 2014. All orders must call for immediate delivery.

Due to tight resin availability AEP will strictly limit our customer's orders in September to a quantity equal to one month of their average historical six months purchases. Your AEP Sales Representative will inform you of your average purchases over the preceding six months. In addition, we reserve the right to accept or decline orders for any reason.

AEP Stretch Film values the relationship with each of our customers. We are working diligently to limit the exposure of a volatile resin market and its impact on our mutual business. We will continue to communicate changes within the market as they evolve.

Thank you for your business and continued support of AEP Stretch Film.

Best regards,
