

August 20, 2014

To Our Valued Customers:

Significant price increases have once again been announced by all petrochemical suppliers in North America. This will affect prices of polyethylene and polyamide resins, which are the major raw materials for packaging products like stretch wrap, bubble packaging and foam packaging.

Our primary suppliers have announced price increases to take effect October 1, 2014. **This letter is to notify you that we will implement corresponding price increases of between 5% and 7% on these products, effective on or before October 1, 2014.** The actual increases may vary, depending on the product line, so please contact your sales representative for more information on the scope of the changes for those resin-based products you purchase from GF.

GF remains committed to offering excellent customer service, quality products, and on time delivery every time.

Thank you for your continued support and understanding.

Sincerely,

Greg Martin

CEO
GF Inc.
