

November 10, 2014

To Our Valued Customers:

We have received notification from our primary suppliers of resin based products that prices will be increasing as of December 1, 2014. These increases are not driven by resin price increase but rather by increases in costs of freight, energy, health-care and non-resin materials. This will affect the prices of resin based products like foam, bubble, stretch wrap and shrink wrap.

Most suppliers have announced price increases to take effect December 1, 2014. **This letter is to notify you that we will implement corresponding price increases of between 3% and 5% on these products, effective on or before December 1, 2014.** The actual increases may vary, depending on the product line, so please contact your sales representative for more information on the scope of the changes for those resin-based products you purchase from GF.

GF remains committed to offering excellent customer service, quality products, and on time delivery every time.

Thank you for your continued support and understanding.

Sincerely,

Greg Martin

CEO  
GF Inc.
