November 6, 2014

Dear Valued Customer,

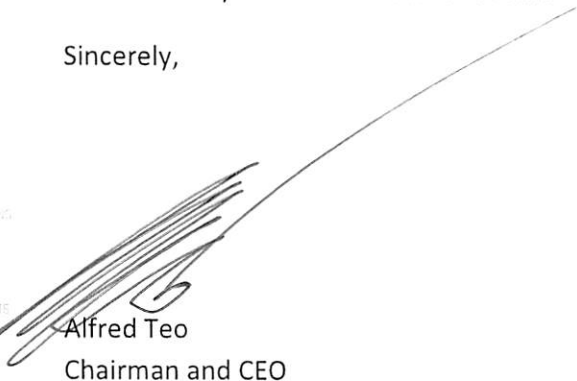

Sigma Plastics Group is committed to our customers and has continually reinvested in our business to make gains in areas of technology, productivity, quality, and service. Sigma accomplishes these gains while still providing innovative products at a competitive market price.

Unfortunately, these gains in productivity have not been sufficient to offset cost increases we have seen in labor, packaging, insurance, utilities, freight, and other non-resin related production costs. This margin compression has brought Sigma to a point where it is imperative for us to recover these costs if we are to remain viable as a valued supplier to our customers.

In response to these production costs increases, all new orders shipped on or after December 1st will be priced at a 4% increase. This increase is in addition to all previously implemented Sigma Plastics increases.

Your Sigma Plastics sales representative will be in contact with you to answer any of your questions and advise you of changing market conditions. Sigma thanks you and is appreciative of the business you choose to favor us with.

Sincerely,

Alfred Teo
Chairman and CEO
